ance Notes on Codes and Abbreviations" appearing at the begin-  
ning of each regular issue of the PCT Gazette.

(54) Title: DATA MANAGEMENT

(57) Abstract: A database containing information relating to a particular topic includes a number of portions (10) which are each sub-divided into a number of sub-portions (12). The sub-portions (12) of each portion (10) are linked to one another in a sequential arrangement wherein each subsequent sub-portion contains further information on the topic. Selected sub-portions (12) include primary key expressions which are embedded in the information contained in the sub-portions and which are linked via a hypertext link, to other sub-portions of the database containing more information on the topic. The invention extends to a computer program product for managing the content of the database and to a method of compiling the database.
